

AU COURSE OF CONSTRUCTION

New construction requires an insurance partner who understands the industry. Building owners look to protect their ground-up construction projects against both physical damage and liability losses. But it's not as simple as just providing protection against fire, theft, and vandalism. You not only need to protect the building but it's also important to look at how soft costs (fees for licenses and permits, realty taxes and other assessments, legal and accounting fees, etc.) are treated in a policy. The AU Course of Construction program includes coverage for soft costs arising from a covered loss and offers comprehensive coverage with unique features to meet your clients' needs.

The AUGold online quoting platform provides access to customized coverage solutions for these hard-to-place risks and other products supported by longstanding underwriting expertise and experience. The AU Course of Construction program includes replacement cost, soft costs coverage, the capability to extend a policy up to 18 months, and additional insureds coverage at no additional cost. These and other niche-specific features help AUGold deliver a superior product to the marketplace.

Work with a partner dedicated to this space and leverage the ability to expand your footprint with our AU Course of Construction product. AUGold is here to help you protect your clients throughout the transitional real estate lifecycle, with the AU Collection of products, which also includes Vacant Property, Builder's Renovation and Dwelling Fire.
